

Small businesses have big concerns.

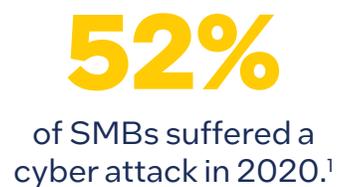

Protecting and growing your business can be stressful, but technology can make life easier. Let PCs built with Intel vPro® Essentials help you worry less about your business and focus more on your customers.

Protect your business

Sophisticated threats have evolved to bypass traditional security measures.

Software failure and cybersecurity issues are the most common causes of downtime with small and mid-sized businesses.³

PCs built with the Intel vPro® Essentials deliver enhanced hardware-based security to help identify early indicators of attacks that software-only solutions could miss. Ready to go right out of the box, the only set up needed is to power on the system.

Grow your business

In a rapidly shifting, work-from-anywhere world, technology is central to any growing business. Built specifically for growing small businesses, Intel vPro® Essentials is a robust PC platform that can help your business:

Maximize productivity: Keep employees productive with PC performance that scales up with the more that they do and gives a boost to the most demanding workloads.

Collaborate with confidence: Employees can videoconference and share more seamlessly, working the way they want with each other, vendors, and customers.

With a little more system know-how:

Intel vPro® Essentials provides hardware-based remote management.

- Centrally manage devices in a secure manner, whether on premises or remote.
- Monitor and patch employee devices through the cloud – over wired and wireless (Wi-Fi), even when the OS is down.

Get built-in value with PCs based on the Intel vPro® Essentials platform.

Business-class performance

Enhanced security

Elevated connections
